# Task 1: Gather and Upload Your Data

To train your Classifier, you will need to download the dataset containing the "Stop" sign images found [here](#) and the "not Stop" sign images found [here](#). They are zipped in a folder.

1. Click on Open Tool.
2. Sign in with your created credentials if it prompts you to.
3. Select the template for this project.

4. **Unzip** the files, then drag and drop the folders into CV Studio.
5. Make sure to wait between each folder to ensure that it has loaded properly.
6. Confirm that images have been loaded.
7. In the **annotate** section, you will see that the images are pre-labeled with the folder name.

Proceed to the next Task, once you have gathered and uploaded your images and verified that your
